Blendex WUM

Description

BLENDEX WUM is a water borne product based on synthetic latex.

Application

BLENDEX WUM is suggested as remoistable adhesive for paper and cardboard: it becomes tacky only after wetting it.

Technical Specifications

Method of analysis	MU	Standard
1. Total Solids	%	30±1
3. Brookfield Viscosity 25°C	mPa.s	2000 - 6000 (1)
8. pH		5 - 6
Solvents		water

(1) N. 4 RV; 20 RPM

Handling

Keep the adhesive at room temperature and stir well before use, since its viscosity tends to increase with the low temperatures. It can be diluted with water if required.
BLENDEX WUM must be applied by direct coating on paper and well dried.

Storing

Shelf life is 6 months (in original drums) at room temperature.
Keep the product protected from freezing, at temperature between +5°C and +30°C.

Use within 6 months from production date (unopened and in the original packaging).

Build date 11 Sep 2025
