Retarder C PVC

Description

RETARDER C PVC is a solvent based additive (Cyclohexanone) for our COLOR INK PVC.

Application

RETARDER C PVC can be used to decrease the drying speed of our COLOR INK PVC, when necessary.

Handling

Add maximum 5% of RETARDER C PVC to COLOR INK PVC, stir well and start printing.

Storing

Store in well closed containers, protected from heat sources and direct sunlight.

Use within 12 months from production date (unopened and in the original packaging).

Above information is reliable, but does not constitute warranty.
