

Color Tape HM Avana 15 P

(Provisional)

Description

COLOR TAPE HM AVANA 15 P is a very efficient pigment masterbatch for colouring adhesive masses, either solvent or hot-melt based. No solvent is involved. It is free flowing and suitable for a continuous adhesive production process.

The addition of COLOR TAPE HM AVANA 15 P to the adhesive does not modify the adhesive properties, including ageing, and does not cause corrosion to the metal parts of production plants.

Aspect: small pellets

Type of pigments: inorganic (metal oxides)

Pigment content: 80% minimum

Other ingredients: dispersing agents, antioxidants, thermoplastic resins as binder

Application

COLOR TAPE HM AVANA 15 P is very easy to handle, dust free, without any storage and packaging disposal problem.

Being in pellets form and based on non toxic materials, products are very safe and clean in handling (see Safety Data Sheet).

Handling

In general, we recommended adding 6-8% on the dry content of the adhesive (approx 50-60% of a classical pigment paste variety).

COLOR TAPE HM AVANA 15 P can be introduced directly into the mixer during any phase of the adhesive preparation. COLOR TAPE HM AVANA 15 P must be used in the same way as a solid resin.

Packaging

The product is supplied in paper bag (20 kg).

Storing

Keep the product protected from direct sunlight and humidity.

Use within 12 months from production date (unopened and in the original packaging).
