Vinilprimer E17

Description

VINILPRIMER E17 is a waterborne primer for plasticized or rigid PVC film. It is based on a balanced blend of synthetic, natural elastomers and resin dispersions, properly stabilized and compounded.

Application

VINILPRIMER E17 allows to obtain a perfect adhesion between the adhesive mass (based on natural or synthetic rubber) and PVC film, without curing.
It is mainly used for self-adhesive tapes and film, either for packaging or technical use.

Technical Specifications

Method of analysis	MU	Standard
1. Total Solids	%	17±1
3. Brookfield Viscosity 25°C	mPa.s	< 150 (1)
8. pH		8 - 10
Solvents		water

(1) No 1 RV; 100 RPM

Handling

VINILPRIMER E17 is ready for coating on PVC film.
Application: 1.0 - 1.5 g dry/sqm. **STIR WELL BEFORE USE**

Packaging

The product is supplied in iron drums (200 kg); IBC containers (1000 kg).

Storing

Store at temperatures between +10 and +40°C. PROTECT FROM FREEZING

Use within 6 months from production date (unopened and in the original packaging).

Build date 11 Sep 2025
