Diluent C PAM

Description

DILUENT C PAM is a solvent blend (isopropyl alcohol - isobutyl-alcohol - heptane and isomers) for polyamidic printing inks.

Application

DILUENT C PAM can be used to clean the printing machine from our COLOR INK PP PAM + ADD and to restore the evaporated solvents in old inks.

Technical Specifications

Method of analysis	UoM	Standard
Solvents	heptane / isopropyl alcohol / isobutyl alcohol	

Storing

Use within 12 months from production date (unopened and in the original packaging).

Notes

Do not use it to lower the viscosity in fresh inks. For this purpose use only our THINNING VARNISH PAM + ADD (find it in our price list).

Above information is reliable, but does not constitute warranty.
